

Course Description

MEDD8666 Abnormal Psychology and Positive Psychology

Course description			
<p>The course will focus on the theory and research about abnormal psychology and positive psychology. Participants will learn about some common mental disorders in the student populations and how positive psychology can help individuals improve their mental well-being. Participants will be encouraged to explore how the current research may be applicable to their own lives and support the positive development of students. Topics will include “anxiety disorder”, “depression”, “attention deficit/ hyperactivity disorder”, “optimism”, “gratitude”, “forgiveness”, etc. Positive interventions to improve well-being will be examined.</p>			
<p>Coursework / Examination ratio: <u> 100 </u> % Coursework, <u> 0 </u> % Examination</p>
