## <u>Course Description</u> MEDD8859 Learning, Teaching and Assessment in STEM Education

#### **Course description**

As an introductory course of the STEM education specialism, this course is aimed at looking at integrated STEM education from its trends, models and theoretical perspectives, conceptualising STEM and contextualising it within the education and broader society, and how these theories inform its learning, teaching and assessment. Particular focus will be given to the relevant learning approaches grounding learning designs for integrated STEM education (e.g., self-regulated learning, scientific investigation, inquiry-based learning, etc.) and the challenges encountered, especially when designing assessment plans for students, through case studies of related learning designs.

## **Course objectives**

- Apply appropriate theories, models and learning approaches to design, develop and evaluate learning designs for integrated STEM education among teachers of different disciplines; and
- Demonstrate an understanding of the strengths and limitations of these theories and any constraints and challenges that may apply in reviewing and preparing for the learning designs for integrated STEM education.

Course learning outcomes (CLOs)		Aligned programme learning outcomes (PLOs)
1.	Understand the importance and role of integrated STEM education in	PLOs 1, 2, 3
	the contemporary world	
2.	Critically review the learning designs for integrated STEM education	PLOs 1, 2, 3
	in Hong Kong and abroad	
3.	Apply appropriate theories, models and learning approaches to design,	PLOs 1, 2, 3
	develop and evaluate learning designs for integrated STEM education	
	among teachers of different disciplines	
Course assessment methods		
•	Group presentation and paper	
•	Individual Task	

• Group / Individual Task: In-class and out-of-class participation

## **Course content and topics**

- Introduction to the course and integrated STEM education
- Trends, models and theories conceptualising integrated STEM education
- Self-regulated learning approach
- Scientific inquiry / investigation approach
- Other learning approaches
- Assessment in integrated STEM education
