

## Course Description

### MEDD8893 Teaching argumentative discourse in Chinese language: A critical discussion perspective

Course description	
<p>The course aims at equipping Chinese language teachers with knowledge of critical discussion and ability to design, conduct and evaluate learning and teaching of exploratory talk and argumentative discourse to enhance students' Chinese language competence in both oral and written form. The course is designed to explore the relationship between critical thinking and language learning within Chinese key language area. Exploratory talk, critical reading and argumentative writing will be covered to examine role of critical discussion in Chinese language curriculum.</p>	
Course objectives	
<p>The course covers topics include framework of critical discussion, deductive reasoning, Toulmin model of argument components, latest development of argumentation theory with focus on core argumentation schemes (argument from example, cause and effect, analogy, and information source), and pragmatic view of fallacies. The course focuses on applying these topics and concepts to develop activities on exploratory talk and argumentative discourse for promoting students' oral and written language competence. Special attention is given to argument diagramming to make critical thinking visible for fostering students' analytic skill on argument structure of oral and written discourse.</p>	
Course learning outcomes	Aligned programme learning outcomes (PLOs)
1. Analyze Chinese discourse with perspective of critical discussion to demonstrate understanding of components and characteristics of critical discussion.	PLO 1
2. Design and implement effective task and activity of exploratory talk and argumentative discourse in Chinese.	PLOs 1, 2
